PROFESSIONAL SUMMARY

I am a highly competent software engineer having worked on a wide range of tools, features and applications. I enjoy finding simple solutions to complex issues which result in a better user or developer experience. My proudest achievement to date is designing and building out a full workflow engine system that deals with 1000s of tasks per day resulting in the streamlining of business practices.

WORK HISTORY

Software Engineer August 2021 - Present

Permanent | Raise (formerly 1PS) | London

- Research and development
- Training and mentoring junior developers
- Writing documentation.
- Developing code.
- Fixing any problems that arise with the software when it is in use.
- Advising clients on the use of the new software.
- End to end architecture
- Solution Design

SKILLS

Agile, CSS, HTML, Javascript, GraphQL, React, Next.js, Node.js, Nest.js, Tailwind

HOBBIES & INTERESTS

Outside of work I enjoy electronics and retro computers. Currently I am building a SD card interface for the ZX Spectrum. I am also designing and building my own mechanical keyboard.
